COUNTY

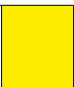

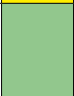

Changes to recycling program

Norfolk County’s recycling program is now managed by Circular Materials, a national not-for-profit organization dedicated to creating an efficient and effective recycling system in Ontario. This change does not impact current recycling collection. For more information, visit Circular Materials’ website at circularmaterials.ca/norfolkcounty.

Reminders

- There is a 4 bag limit, and 18 kg (40 pound) weight limit per bag
- Waste must be set out by 7 a.m. on day of scheduled pickup
- Recyclable materials in plastic bags will not be accepted
- To inquire about recycling bins, please call Norfolk Disposal Services Ltd. at 1-800-616-0347

Composting tips

Composting is a natural process in which organic materials decompose and become nutrient-rich soil. Composting aids erosion control, promotes soil fertility, and stimulates healthy root development.

Composters can be purchased from the Simcoe Recreation Centre at 182 South Drive in Simcoe.

How long does composting take?

- Composting can take from 3 to 18 months, depending upon how well the pile is maintained
- A one-inch (2.5 cm) layer of finished compost or garden soil spread on top of kitchen scraps will speed things up

- A dry or frozen pile decomposes more slowly, as does one that is never turned
- Compost is ready when its texture is crumbly and it has a pleasant, earthy smell

How do I ensure the compost doesn't smell unpleasant?

- Aerate compost regularly by turning it
- Avoid composting meat, fish or dairy items, as well as bones, pet waste/litter, cooking oil, rhubarb leaves, and toxic or diseased plants and weeds
- Add dry materials if it is too wet
- Shredded paper can be added to compost that is too wet
- Bury fruit and vegetable trimmings at least 6 inches (15 cm) deep
